

Two Stars in The Sky

As the sunlight fades
Away into darkest blue
Two stars appear
To chase round the moon
Two stars light the view
Two stars and the moon

One shines here for me
One light shines for you

Two stars in the sky
Two stars bright in view
Hear my wish tonight
For a dream come true

Two stars always true
Two stars bye and bye
One to help the other
Carry me home to you

Two stars forever bright
Two stars stay together
Two stars to say forever
How much I love you

-Karl Sandstrom
